## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/7/05 has been entered.

### *Claim Rejections - 35 USC § 101*

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 37 and 38 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed method consists solely of the manipulation of an abstract idea and is not concrete or tangible. See *In re Warmerdam*, 33 F.3d 1354, 1360, 31 USPQ2d 1754, 1759 (Fed. Cir. 1994). See also *Schrader*, 22 F.3d at 295, 30 USPQ2d at 1459. In addition, the claim is devoid of any limitation to a practical application in the technological arts. The invention in the **body** of the claim must recite technology. If the invention, in the body of the claim, is not tied to technological art, environment, or machine, the claim is not statutory (see *Ex parte Bowman*, 61 USPQ2d 1665, 1671 (BD. Pat. App. & Inter. 2001). Also note MPEP 2106 IV 2(b). Examiner notes that this is not a precedential decision but it is being cited for its analysis of whether the claim is in the technological arts.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 37-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37 appears to be directed to a method for issuing prepaid negotiable instruments to an account holder but the body of the claim is directed to a transaction terminal for issuing negotiable instruments. The metes and bounds of the claim are unclear. There is not a positively recited method step of issuing prepaid negotiable instruments to an account holder. Lines 10-17 appear to be directed towards providing a server system where a negotiable (not prepaid) instrument is issued.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 3624

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 22, 24-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gatto (US 6149055).

Gatto discloses a system for issuing prepaid negotiable instruments to an account holder comprising a database for storing an account identifier, a transaction terminal for issuing negotiable instruments and a server system in communication with the database and the transaction terminal(see abstract, col. 6-8) but does not disclose a means for issuing negotiable instruments. Gatto teaches an electronic fund transfer system where it may conduct a variety of transactions, including issuing negotiable instruments. It would have been obvious to one of ordinary skill in the art at eth time the invention was made to use the electronic funds transfer system of Gatto and use a means for issuing the negotiable instruments as Gatto teaches the system of electronic funds may be used to issue negotiable instruments (col. 5, lines 40-45).

Examiner takes official notice that it was notoriously well known to use the further limitations of the dependent claims 24-36 as these limitations further enhance the usability of the system. It would have been obvious to one of ordinary skill in the art at the time the invention was made for the above reasons.

Specifically as to claims 37-38, see above rejection for claim 22 and in addition see abstract, see col. 2-5, see figs. 1, 5-6.

***Response to Arguments***

Applicant's arguments with respect to claims 37-38, 22, 24-36 has been considered but is moot in view of the new ground(s) of rejection.

Since the applicant did not traverse the examiner's assertion of official notice, the well-known in the art statement, "that it was notoriously well known to use the further limitations of the dependent claims 23-36 as these limitations further enhance the usability of the system" is taken to be admitted prior art because applicant failed to traverse the examiner's assertion of official notice.

With respect to the 35 USC 112 second paragraph rejection, the claims do not include a step of issuing a prepaid negotiable instrument.

With respect to applicant's arguments that the ATM system in Gatto discloses no means for issuing negotiable instrument. Examiner points out that the ATM in the Gatto reference is capable of performing the function of issuing negotiable instruments.
